

How to sort CARDBOARD AND PLASTIC WRAPPING

1. Please put all clear soft plastic wrappings in the specially ventilated plastic bag on the bagholder. No coloured plastics please!
2. After filling and closing the bag seal it and put it into the container along with the cardboard.
3. Disassemble and fold all cardboard boxes before you put them in the container intended for cardboard and plastic wrapping. This saves space in the container resulting in fewer emptyings and less cost.
4. Leftover materials that are not recyclable are put into a separate container marked **(Almennt sorp)** „General waste“

Any questions? Please phone 535 2510.
